

## POST-PANDEMIC LIVING – PART 2

### FUEL

#### PSALM 37:4

**Preface:** As this new post-pandemic world dawns over the horizon there is one element that we are all going to need, that is FUEL. The tank of our lives will need filling up. The length and severity of the pandemic has drained many lives. Many have been drained of vitality, of joy, of hope, of peace, of strength, and the list goes on. Part 2 of this series looks at the importance of the right fuel to ignite our inner engines and truly propel us forward. I want to invite you to take a moment to pull over and allow this word to refuel you and then continue your journey to the life that God has ordained for you and your house.
